inoQulate: The document security solution to protect your PDFs against Quantum Attacks.

About pQCee:

pQCee Pte Ltd is a startup in the quantum cybersecurity space. We are in the business of designing and building post-quantum products and services to strengthen and protect the next generation of computing against quantum attacks. Please visit www.pqcee.com or contact info@pqcee.com for more details.

About the inoQulate offering

Currently, your digital documents and their contents are validated by cryptographic algorithms. However, that may all change when quantum computing technology and systems arrive. In the post-quantum era, malicious actors can break the existing cryptography and make unauthorized changes to your digital documents and agreements. Once evidence of tampering exists, the authenticity of your documents and agreements will be brought into question and this can adversely affect your ability to enforce them in the court of law.

By using inoQulate, our proprietary "Signature Pre-Image Proof" (SPP) technology adds a quantum-resistant zero-knowledge proof layer to strengthen the digital signing keys of the parties in your documents. Your documents become immunized against quantum attacks, and you can continue to demonstrate the authenticity and validity of such documents and the data in the future.

What our customers are saying

"In this digital age, all our assets are stored in electronic format. Having them secured against potential quantum attacks is important to our ongoing operations."

– Director of a VC fund

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
